1. General Statement of Intent

- 1.1. Reigate Grammar School (hereafter referred to as “the school”) recognises and accepts its responsibilities for providing, so far as is reasonably practicable, a safe and healthy place of work for its entire staff and a safe and a healthy educational environment for all its pupils.
- 1.2. It also recognises its duty to protect the health and safety of other persons who may be affected by its activities, both on and off site.
- 1.3. The school is committed to “best practice” in matters of health and safety and shall endeavour, where practicable, to achieve a higher standard than may be required by KSA standards and guidance.

2. General Policy and Procedure

It is the school’s policy to:

- 2.1. Promote a positive attitude from staff and pupils towards all matters relating to health and safety.
- 2.2. Make all staff aware of their responsibilities under the Health and Safety relevant legislation to ensure the maintenance of a safe and healthy working environment.
- 2.3. Provide training/briefing on health and safety matters for all staff to inform them of the school’s practices and procedures.
- 2.4. Provide appropriate health and safety training/briefing for staff so that they understand their duties and responsibilities and are capable of carrying them out.
- 2.5. Encourage pupils’ awareness of the general health and safety risks and how they can be involved in reporting and maintaining good safety standards.
- 2.6. Treat health and safety considerations as an integral part of the planning, design, building and alteration of premises; also, in drawing up safe systems of work and the introduction of new equipment and/or working practices.
- 2.7. Encourage consultation on all relevant matters of health and safety with appointed staff safety representatives.
- 2.8. Draw the school’s health and safety requirements to the attention of contractors working on school premises at the beginning of each contract so that their activities will be subject to agreed safe working procedures.
- 2.9. Define responsibilities of management and staff, for health and safety procedures to be effectively discharged.
- 2.10. To safeguard, as far as is reasonably practicable, the health, safety, and welfare of pupils and visitors who may be affected by the school’s activities and processes.

3. Application

- 3.1. The statement of general policy and procedures on health and safety applies to all staff of the school who have been contracted to work within, or at, any school premises. These are defined as any building, car park, playing field, or other area wholly, or partially owned and/or controlled by the school.

4. Management, Organisation and Arrangements

- 4.1. The Board of Governors of the school is ultimately responsible and accountable for ensuring the school complies with its statutory health and safety obligations.

- 4.2. The Principal is responsible for the overall management of health and safety within the school and chairs the school's Health and Safety Committee.
- 4.3. The Operations Manager and several key staff assist the principal in the undertaking of his/her responsibilities.
- 4.4. The Operations Manager will ensure that statutory provisions are complied with, that workplace policies and associated arrangements are effectively implemented, and will maintain and update as necessary the school's statement of policy and procedures.
- 4.5. Heads of Primary and Secondary will be responsible for ensuring that:
- they keep themselves informed of their health and safety duties and any developments in health and safety regulations applicable to the activities of their teams through regular liaison with the principal and parties appointed by the principal to provide information;
 - all staff within their departments are aware of the health and safety risks connected with their duties and have received adequate training to enable them to perform their tasks to agreed safe working practices;
 - appropriate risk assessments, required by statutory provision, are carried out within their areas of responsibility, and reviewed with assistance from nominated key staff;
 - departmental health and safety performance is regularly monitored and reviewed and any areas in need of improvement are discussed with the staff involved and action agreed to rectify the situation;
 - Heads of Primary and Secondary support the school's general statement with relevant plans for their areas of responsibility;
 - the departmental plans incorporate relevant safe working procedures and practices applicable to the activities being carried out and are drawn to the attention of their members of staff;
 - departmental staff attend necessary health and safety training courses, online and face to face.
- 4.6. All staff are responsible for ensuring that they:
- take reasonable care for their own health and safety whilst at work;
 - take reasonable care for the health and safety of pupils and other persons who might be affected by the things they may or may not do during their employment;
 - co-operate with those arrangements made by the school in compliance with its statutory obligations;
 - take care of, and not intentionally interfere with or misuse, anything provided in the interests of health and safety;
 - do not indulge in practical joking or horseplay in the workplace.
 - familiarise themselves with the school's health and safety policy and comply with all arrangements, emergency procedures and fire precautions made by the school;
 - understand and adhere to all school safe-working procedures and practices and seek clarification from their Heads where they are not clear about any aspect of these;
 - report all accidents/incidents to their Heads and the School Office Team as soon as they occur;
 - keep their work area tidy and prevent the obstruction of walkways, fire exits or the creation of slip and trip hazards;
 - report immediately to their Head or the Property Manager any work situation or condition that they consider a danger to the health and safety of themselves or other persons;

5. Information

- 5.1. The provision of information on health and safety is an essential part of any effective health and safety management system.

- 5.2. Within the school, the Operations Managers and the Heads of Primary and Secondary will ensure changes to health and safety legislation and any other relevant information, that may affect their area of responsibility, are implemented as necessary. Information to staff will then be disseminated as necessary.

6. Accident Reporting

- 6.1. Every accident/incident in a school building, on school grounds, or during school outside activities must be reported and recorded via the School Office Team who will inform members of the Senior Management Team as necessary.
- 6.2. The person involved, witnessing, or attending the accident/incident must record the specific details with the School Office Team on the day of the accident/incident, or at the latest by the following day. Reportable events are communicated to members of the Senior Management Team as necessary.

7. First Aid Arrangements

- 7.1. First aid arrangements will be delivered in line with the First Aid Needs Assessment, completed by the Operations Manager.
- 7.2. First Aid is defined as “treatment for the purpose of preserving life and minimising the consequences of injury or illness until appropriate help is obtained and the treatment of minor injuries that require limited intervention”.
- 7.3. The first aid arrangements of the school are provided in accordance with the requirements of the Health and Safety (First Aid) KSA Regulations and are detailed in **The First Aid and Medical Provision Policy**.
- 7.4. Enough first aid boxes will be provided at specific locations throughout the school premises. See **The First Aid Policy** for details of locations.

It will be the responsibility of the School Nurse, who has primary responsibilities for First Aid to ensure that only those items stated under KSA’s regulations are kept in each first aid box and that they are maintained to minimum stock levels.

8. Administering Medication

- 8.1. Where the school receives a request from a parent or guardian to administer or assist in administering medication to a pupil, the school nurse will be responsible for receiving written authorisation from the parent/guardian and for organising administration. See **The First Aid and Medical Provision Policy** for details.
- 8.2. Any medication should be:
- brought into school by the parent, guardian or pupil in a suitable container clearly labelled with the contents and the pupil’s name and directions for the correct dosage; the parent must sign the form to authorise the administration of medicine(s);
 - kept in a locked cupboard preferably in the Medical Room or other secure and suitable location until required.
- 8.3. In the case of inhalers for asthma sufferers, these may be retained by the pupil so as not to delay administration at the onset of an attack.

9. General Risk Assessment

- 9.1. A risk assessment is defined as a careful and systematic examination of what might cause harm (injury, ill health, or damage) in the workplace taking account of who might be affected and the control measures already in place to minimise exposure to that harm.

- 9.2. The purpose of risk assessment is to identify significant hazards and risks and then determine and implement appropriate control measures required, either to remove, reduce or protect against them.
- 9.3. Risk assessments must be completed for any activities where there is the likelihood of harm or loss to be caused; hazardous activities and hazardous locations should have risk assessments completed.
- 9.4. Heads of Primary and Secondary are responsible for ensuring that suitable and sufficient general risk assessments, and specific assessments where appropriate, are carried out within their departments, communicating the findings of these risk assessments to relevant individuals, storing them in a central portal and reviewing the risk assessments at least annually, or sooner if required.
- 9.5. There is a separate school policy and procedures on risk assessments.

10. Fire Safety

See the separate Fire Policy and Fire Policy Appendices.

11. Utilities (electricity, gas, and water)

Electricity

The Chief Operating Officer (COO) is the responsible person in dealing with the utility companies, and for ensuring that the varying statutory requirements for the safe usage of the utility, provision and maintenance of equipment using them, and the ultimate disposal of redundant equipment beyond economical repair is managed in accordance with current best practice.

The Property Manager will ensure that all construction or maintenance work involving electricity is carried out in accordance with the current KSA regulations and that all work carried out within the school site is certified to these standards.

- 11.1. All electrical appliances purchased centrally by the school, or by individual departments, must be checked for electrical safety by the school electrician or other designated person before being used.
- 11.2. All portable electrical appliances (tools/equipment) and fixed equipment will be subject to periodic inspections arranged by the Property Manager in consultation with the key staff.
- 11.3. All staff must ensure that all electrical equipment is kept in good condition and any defects or damage is reported to the Heads of Department responsible for the area in which the equipment is located.
- 11.4. If an electrical appliance develops a fault, staff should ensure that they turn it off at the socket and unplug it or isolate the power to the item. If it is a fixed appliance, a notice should be put on it stating, Faulty Do Not Use, and the fault reported to the responsible Head of Department
- 11.5. All staff should ensure that no socket should be overloaded using an adaptor or multi-gang socket extension. Any doubts on the safety of electrical connections should be referred to the school electrician or other designated person.
- 11.6. Trailing leads must be avoided, and staff should ensure that before a piece of electrical equipment is re-positioned account must be taken of where the nearest socket is located to prevent cables being positioned across gangways or floors.
- 11.7. Staff are discouraged from using private, portable electrical appliances on school premises. All portable items must be checked by the school electrician or other designated person before it is used.
- 11.8. If equipment operating at 230 volts or higher is used, a Residual Current Device (RCD) can provide additional safety. An RCD is a device that detects some, but not all, faults in the electrical system and rapidly switches off the supply. The best place for an RCD is built into the main switchboard of

the socket-outlet, as this means that the supply cables are permanently protected. If this is not possible a plug incorporating an RCD, or a plug-in RCD adaptor, can also provide additional safety.

RCDs for protecting people have rated tripping current (sensitivity) of not more than 30 milliamps (mA).

Remember:

- An RCD is a valuable safety device, never bypass it.
- If the RCD trips, it is a sign there is a fault. Check the system before using it again.
- If the RCD trips frequently and no fault can be found in the system, consult the manufacturer of the RCD.
- The RCD has a test button to check that its mechanism is free and functioning. Use this regularly.

Gas

- 11.9. The school complies with the requirements of the Gas Safety Regulations. The school engages a registered Gas Safe contractor who will carry out the required maintenance and testing of gas-fired equipment, as arranged by the Property and Facilities Manager.
- 11.10. The school has a statutory duty to provide adequate supplies of potable water throughout the school, which it does. There is also the requirement to maintain water systems to prevent or control the legionella bacteria so that risk to persons at or near the school are minimised. The Property Manager has the delegated responsibility for the main school buildings and services. The Property Manager reports directly to the Operations Manager and the COO.

12. Display Screen Equipment

- 12.1. It is recognised that regular use of display screen equipment does not present an undue risk to health subject to the suitable arrangement of the workstation and sensible use of the equipment by staff.
- 12.2. “Workstation” is a collective term given to the display screen equipment consisting of a monitor-screen, mouse, and central processing unit. In addition, it also covers any accessories such as a printer, scanner, telephone, document holder, as well as the desk, chair, and other furniture and the surrounding environment with respect to heating, lighting, and noise, etc.
- 12.3. The school defines a “DSE User” as a person who habitually uses DSE as a significant part of their work. The school deems DSE users as all administration staff and Senior Leadership.
- 12.4. The arrangements are that nominated personnel are trained in how to do workstation assessments. They complete workstation assessments for:
- New staff
 - Staff returning to work after an accident or long period of sickness
 - Staff receiving a new workstation, chair, or other associated equipment
 - Expectant mothers
 - Staff receiving new software
 - Staff who report pain and discomfort from using their workstation

13. Use of Work Equipment

- 13.1. Work equipment is described as “any machinery, appliance, apparatus, tool or installation for use at work”. Use means “any activity involving the work equipment such as starting, stopping, setting, servicing, cleaning maintaining, etc.”
- 13.2. The school will ensure that all work equipment used on its premises by staff and pupils is appropriate for its intended use, safe and without risks to health.

14. Personal Protective Equipment

- 14.1. Personal protective equipment is defined as “all equipment designed to be worn or held to protect against risk to personal health or safety”. Such equipment could be a respiratory mask to prevent the inhalation of dust, or gloves to protect hands from hot, rough, sharp surfaces etc.
- 14.2. Personal protective equipment should only be used as a last resort where identified risks have not been able to be adequately controlled by other means.
- 14.3. The school will ensure that where it is necessary, through the findings of a risk assessment, adequate and suitable personal protective equipment will be provided to protect staff and students from risks to their health and safety because of education and employment activities.
- 14.4. Heads of Department are to ensure that where personal protective equipment is necessary, it is correct for the risk it is seeking to protect the wearer against, and suitable for the person wearing it, fitting properly and giving adequate protection. Also, where relevant, staff and students are given appropriate training and instruction on how to use it.

15. Control of Substances Hazardous to Health

- 15.1. The use of hazardous substances within Reigate Grammar School Riyadh is kept to an absolute minimum. The areas where hazardous substances are used and stored are Science laboratories, Maintenance, Catering, Cleaning, Print Room and Grounds. Material safety data sheets for hazardous substances used within the school are kept and maintained by the relevant department or Head of Department. Instructions for the storage and safe handling of such hazardous substances are to be issued by the appropriate representative, who is also responsible for ensuring they are complied with.
- 15.2. Hazardous substances can also be produced from work activities such as wood dust from machinery, silica dust from pottery, fumes from chemical experiments etc.
- 15.3. The school has a duty to assess the use at work of hazardous substances and will take adequate steps to prevent or control exposure to these substances by staff, pupils, and other persons.

Staff also have a duty to ensure that they use a hazardous substance in accordance with the manufacturers’ instructions or safe working procedures relating to the substance, and do not expose themselves or others to risk because of the way in which they work.

16. Workplace Health, Safety and Welfare

- 16.1. All Staff are reminded that they have a responsibility to assist the school in fulfilling its duty to provide a safe environment and to prevent the risk of accidents caused by slips, trips and falls. This means staff paying attention to good housekeeping by:
- reducing trip and slip hazards through not obstructing floor space where there is frequent movement and removing or protecting all trailing cables;
 - properly storing items on shelves or in cupboards and not on top of cupboards where they could fall off and injure someone;
 - placing wastepaper and other combustible rubbish in proper containers to minimise potential fire risk;
 - clearing up all spillages when they occur to avoid slipping accidents;
 - ensuring any broken glass is safely contained to avoid potential cuts from exposed fragments and safely disposed of as soon as possible after the incident;
 - reporting any damaged flooring or any other matters that could create health and safety risks to the Property and Facilities Manager;
 - staff not endangering themselves or others and using safety equipment provided;
 - wearing suitable clothing including footwear appropriate to their job and conditions to reduce the risk of trip and fall incidents.

17. Manual Handling

- 17.1. Guidance on manual handling applies to the whole school community. Incorrect lifting of loads at work or trying to lift loads that are too heavy can cause significant injuries that result in pain and suffering and time off work. The school has an obligation to avoid where possible the need for manual handling activities at work, or where this cannot be avoided, then to take action to reduce to the lowest level the likelihood of injury occurring and provide manual handling training where necessary.
- 17.2. Staff should not attempt to move loads that are too heavy or too awkward for them to carry safely. They must seek help from the Maintenance department and Porters via the Property Manager. Such staff have been trained in manual handling techniques.
- 17.3. Heads of Primary and Secondary must ensure that manual handling risks in their department are adequately assessed through the risk assessment process and relevant staff receive training and refresher training. They must ensure records are kept of the training.
- 17.4. If pupils are required to carry out manual handling tasks, the activity must be risk assessed and particular attention paid to the age, sex, and physical ability of the pupil. Manual handling training must then be given..

18. Working at Height/Ladders

- 18.1. Working at height tasks within the school are undertaken across a variety of departments. The school tries to avoid working at heights where it can and if it must take place, it takes steps to reduce the likelihood of a fall if one were to occur.
- 18.2. Work at height will be assessed in relevant risk assessments.
- 18.3. Appropriate work at height/access equipment will be provided in relation to the type of tasks and as deemed by the risk assessment.

19. Violence and Aggression at Work

- 19.1. In the event of a member of staff being faced with verbal and or physical violence whilst at work every effort should be made to reduce the threat by acting in a calm, non-threatening manner.
- 19.2. Where such actions do not have an effect, staff should aim to remove themselves from any immediate risk by placing a barrier between themselves and the source of the threat, ensuring that they do not block their means of escape, and seek appropriate assistance.
- 19.3. Under No Circumstances should offensive or abusive language, threats or physical force be used when provoked. Only use the minimum force necessary for defence against personal injury if there is no other option available.

20. Managing Stress at Work

- 20.1. Stress is defined as “the reaction people have to excessive pressures or other types of demands that are placed on them”. If demands and pressures become too great, they can induce harmful mental and physical feelings and responses.
- 20.2. The school is committed to ensuring so far as is reasonably practicable that no member of staff is subjected to an undue level of stress whilst at work that may be detrimental to their health.
- 20.3. Where it does occur then it is the school management’s objective to ensure that all such cases are dealt with openly and fairly.

21. Lone Working

- 21.1. The school recognises that certain members of staff are required to work alone without close or direct supervision as part of their contract of employment, and that they may be at risk either from intruders or personal accident when no help is available. Where this is a regular and routine occurrence, a specific assessment will be written, the safety control measures analysed, and risks communicated to those at risk.
- 21.2. In addition, it also recognises that there are ad hoc occasions when other members of staff work beyond normal working hours on their own, who again are potentially at risk from intruders or personal accident when there is no readily available help
- 21.3. Where staff work beyond normal working hours on their own, or are on school premises outside normal working times, e.g., at weekends or during school holidays, they must sign in/out at the Reception Desk. The COO reserves the right to authorise or stop such access in consultation with other senior staff.
- 21.4. During school holidays staff must sign in and out at the Reception Desk and adhere to the times and access restrictions in place, as advised by the Operations Manager, prior to each holiday period. When the Reception Desk is not manned a duty, mobile is in placeto contact the Property Manager or Assistant to update as necessary.

The school accepts its responsibility to minimise the risk that might arise from lone working so far as is reasonably practicable.

22. Off-site Educational Visits

- 22.1. Educational visits are defined as “any activity off school premises which is part of the pupils learning programme or is organised by the school for the benefit of the pupil”.
- 22.2. The school is committed to ensuring the safety of staff and pupils on all such visits and will follow best practice to achieve this.

22.3. All staff shall ensure when leading or participating in any educational visit, that they adhere to the highest standards organisation, administration and supervision and must read the school's general guidelines on educational visits and comply with the specific procedures relating to:

- Day Trips
- Residential Visits in KSA
- Residential Visits Abroad
- Visits involving Hazardous Activities

22.4. Guidance on the preparation for and management of offsite educational visits is provided by the Head Extra-Curricular. This consultation must take place in the early planning stages of each trip prior to it being sanctioned.

23. Health and Safety Committee

23.1. The School Health and Safety Committee meets every two weeks.

23.2. The health and safety for the school will be subject to review every 2 years by the COO unless it should require a significant amendment before this time which will then be carried out as and when necessary.

24. Emergency Contact Numbers

24.1. In the event of an emergency, all employees are required to immediately contact the following individuals:

1. Security:

- Rasel Miah - 0551773967

2. Properties and Facilities Manager:

- Jessica Mahinay - 0551412718

3. Operations Manager:

- Nicola Layne - 0581690091

4. Nurse:

- Ma Cherry Pie Quintia - 0566290667
